---

*Experienced Software Engineer with over 6 years in the technology sector, specializing in building robust and user-centric web applications with Angular. Proven ability to architect scalable solutions and a strong commitment to writing clean, high-performance code. Actively seeking a challenging frontend development role in the Netherlands.*

## PROFESSIONAL EXPERIENCE

---

### Asix - Grupo Alonso

Front-end developer

Valencia, Spain

September 2021 – November 2025

Building and maintaining user-centric Angular applications for the logistics sector, focused on scalability and performance.

- Architected a modular SCSS library adopted across 5+ projects, reducing UI development time by 20%.
- Designed a polymorphic "Storage grid" ecosystem: Engineered a highly reusable Angular component to visualize diverse logistical units (warehouses, vessels, trains) handling complex layouts (multi-span items, dynamic headers) and Drag & Drop reallocation. Implemented the Factory Method design pattern to orchestrate abstract data services, decoupling the UI from specific business logic and ensuring complete scalability across different storage types.

### Asix - Grupo Alonso

Software developer

Valencia, Spain

July 2019 – August 2021

Engineered high-performance backend solutions in C++ and developed C# desktop applications to streamline internal business processes.

### My Energy Map

Web developer

Valencia, Spain

March 2017 – September 2017

Modernized a legacy table-based PHP application, advocating for and executing a complete rewrite. Introduced a decoupled JavaScript (jQuery) frontend layer while maintaining PHP business logic, which drastically improved UI usability and code scalability.

## EDUCATION

---

### IES Consellería

Higher national diploma in Web Application Development

Valencia, Spain

2015 – 2017

### IES Consellería

Higher national diploma in Web Application Development

Valencia, Spain

2015 – 2017

*Includes a 6-month international internship in Tallinn, Estonia (Erasmus+ Programme)*

## SKILLS

---

### Languages

- TypeScript
- JavaScript
- C++
- C#

### Front-end

- Angular
- RxJS
- NGRX
- SCSS

### Back-end & database

- Node.js
- MySQL
- SQL Server

### Tools & development

- Git
- Jira
- Proxmox
- Docker
